Cutout ratio

Frame (X)	Leaf (Y)	Distance (Z)	Radius (R)
4 mm	4 mm	-1 mm	0 mm
Free choice of intermediate sizes up max.			
8 mm	8 mm	-1 mm	3 mm

Please note that the cut-out ratios become more unfavourable downward in the table with the effect of reducing the adjustability of the hinge.
Ideal case: door recess 4 mm, frame recess also 4 mm (grayed out).
A big radius at the door and frame is recommendable.
