This extensive range comes in a broad range of fittings to suit every need and budget from basic to premium; there is something for everyone - Scandinavian design at its best.

Keep an eye out for the latest news and updates on all our products on our website and social media platforms.

ENVIRONMENT AND SUSTAINABILITY

Theofilis prides itself on striving to create sustainable products which are environmentally friendly as well as having high quality design and finish. We are solution focused and take reducing our impact on the environment seriously by looking at logistics and running campaigns to highlight this vital cause in collaboration with Swedish actors.

We carry out annual audits of our operations and our findings are reported in our environmental handbook; a further step which monstrates how seriously we take our position as a producer in this field.
