DISPENSA junior III

OUR SUCCESSFUL THIRD GENERATION
STORAGE FITTING

A FRESH BREEZE FOR OUR BESTSELLER

THE ENTIRE DISPENSA FAMILY PROFITS
FROM THE NEW FLEXIBILITY

— KESSEBÖHMER —

QUICK QUICKER ClickFixx

SIMPLE, TOOLLESS
ASSEMBLY

QUICK, EASY, PRECISE: ClickFixx ASSEMBLY SAVES VALUABLE ASSEMBLY TIME AND ENSURES CONSISTENTLY HIGH QUALITY. Assembly of the DISPENSA junior III has been simplified on two fronts at the same time.

First – and nothing could be simpler – the fitting is snapped into the runner. Then the front panel is clipped onto the fitting – it's quick and accurate and no tools are needed. Finally the pull-out is closed and opened – job done! The entire assembly is designed for highly flexible integration into the manufacturing process chain. The DISPENSA junior III is equally suited for side or bottom mounting – to suit requirements and installation conditions.

ClickFixx assembly and real-time adjustment together guarantee high assembly quality while cutting installation time to a minimum.

The front panel is
clipped onto the fitting

The fitting is positioned on the runner.
Open it – close it – job done!

BENEFITS AT A GLANCE

- Toolless assembly based on ClickFixx
- 3D adjustment in real time
- Optimized for industrial processing
- Side-mounted installation for 16 mm and 19 mm panel thickness
- Bottom mounting is ideal for retrofits
- For all carcase widths from 300 mm to 600 mm

3D ADJUSTMENT IN REAL TIME

SEE WHAT YOU'RE DOING!

 KESSEBÖHMER

THE DISPENSA junior III MAKES FOR SIMPLER FRONT PANEL ADJUSTMENT THAN EVER BEFORE: FULL 3D ADJUSTMENT IN REAL TIME! Once the front panel has been ClickFixxed quickly and securely to the new DISPENSA junior III, it can be adjusted — in real time — in all planes and directions. The process is quick and totally reliable! Because even the slightest turn of an adjusting screw has an immediate effect on the front panel position. All it takes is a PZ2 screwdriver to intuitively make the following adjustments: right/left (alignment), top/bottom (front panel height) horizontal tilt (carcase contact) and vertical tilt (alignment).

Because any change shows in real time, front panel adjustment for the DISPENSA junior III is now even faster and more accurate.

BASE UNIT FITTINGS

The **larder unit** under the counter.

All the tray styles developed for the DISPENZA tall units also fit a DISPENZA junior III. This makes it easy to create a harmonious look behind the fronts in a kitchen with the DISPENZA family.

Having the same look and the same functionality – for example, ARENA variants, easy height change, access from both sides – extends all the benefits of a tall larder unit to the base unit fittings as well.

In addition to the choice of DISPENZA standard trays, there's an extra highlight for the DISPENZA junior III in the shape of a special clip-on basket with a bread bag.
